OBJECTIVE

Recent Computer Science and Information Systems graduate with strong programming skills in Java, C++, and expertise in OOP, algorithms, and cloud technologies. Seeking a software development position where I can apply my skills in developing efficient and innovative solutions.

EDUCATION

B.Sc. in Computer Science and Information Systems   **Sep 2019 - Jul 2023**

October 6 University

- Final GPA: 2.7 (Good)
- Graduation Project: Class Scheduling System
  - With garde : A

CERTIFICATIONS

- Core Java Programming, Udemy
- Introduction to Git and GitHub, Google (via Coursera)
- Programming Fundamentals, University of California San Diego (via Coursera)

TECHNICAL SKILLS

- Languages: Java, C++, HTML, CSS
- Frameworks: JavaFX
- Databases: MS SQL
- Cloud Platforms: AWS, Alibaba Cloud
- Tools: Git, GitHub
- Concepts: OOP, Data Structures, Algorithms, Design Patterns.
- Operating Systems: Linux

PROJECTS

Chat Room Application
- Developed a chat room application using Java and JavaFX with OOP principles.
- Supports multiple clients on a local server using Java SE.

PC Age Calculator
- Created a C++ program that calculates the age of a PC by retrieving the BIOS manufacturing date and comparing it with the current date.

Paint Application
- Built a paint application in Java, implementing core drawing tools and user interface design.

PERSONAL SKILLS

- Problem Solving
- Time Management
- Teamwork
- Adaptability
